GLOBAL CLIMATE EXPEDITION

**PRESS RELEASE – 14<sup>th</sup> of May 2013**

**TOPtoTOP Global Climate Expedition under the patronage of United Nations Environment Program arrives in Hilo – Hawaii - USA on the 14th of May 2013 coming from Panama. On the 50 day sailing voyage they were investigating waste debris in the ocean for the International Pacific Research Center based in Honolulu. In Hawaii, they plan to organize beach clean-ups and school presentations to inspire students to protect the environment.**

The expedition will achieve a world record, by being the first to travel all climate zones - over the seven seas to the seven summits - using only Nature’s Power! They do this in order to set an example of what can be done to live in harmony with our environment, sharing collected climate solutions with students along the way.

In June they will sail to Mount Denali in Alaska, then through the NW Passage in the Arctic, continuing their journey to be the first sail-yacht to circumnavigate the two Americas from pole to pole in a figure of eight, making best use of the wind and currents. This section of the global adventure will be completed by climbing Mt Vinson - Antarctica.

The TOPtoTOP expedition has so far climbed from “Sea to TOP” the highest TOP measured from sea level: Everest - Nepal, the highest TOP measured from the center of the earth: Chimborazzo - Ecuador, and now they are keen to climb the highest peak measured from the sea-floor: Mauna Kea - Hawaii!

The expedition hopes the locals will join them next weekend climbing to the peak!

<b>Expedition sailboat Pachamama in Port open to the public and activities</b>	
<b>14.-20. of May 2013</b>	<b>Hilo, Big Island: climbing top of Hawaii, school visits</b>
<b>21.-31. of May</b>	<b>Honolulu, Oahu Island: clean up and public presentation at IPRC, school visits</b>
<b>1.-8 of June</b>	<b>Hanalei Bay, Kauai Island: clean-up, school visits</b>
<b>24. June</b>	<b>ETA Dutch Harbour Alaska</b>

Students from College de Port Mathurin in Rodrigues visit PACHAMAMA after TOPtoTOP presentation

Expedition leaders Dario and Sabine Schwörer

The Swiss family Schwörer are the core expedition team members. The 4 children were born on the expedition. Alegra the youngest crew on board is 2 years old, Noé 3, Andri 6 and Salina 7. Volunteers join the family. They are engaged in educational activities with schools and universities, inspiring for example the use of clean energy. So far they have sailed 60'000 nautical miles in their expedition vessel, climbed over 400'000 vertical meters, cycled over 18'000 kilometres and visited over 70'000 students!

TOPtoTOP Global Climate Expedition began in 2002, and is a non-profit organisation of volunteers from 47 nations, based in Switzerland, under the patronage of the United Nations Environment Program and the Swiss Government. The yacht, PACHAMAMA, (Incan word for "Mother Earth"), is equipped with 11 Solar Panels and 2 Wind turbines, making it THE example for the cruising world, demonstrating what is possible in extreme conditions with smart renewable technologies. After more than 10 years on their mission, the team arrived in South Africa for the World Climate Conference in Durban end of November 2011. They demonstrated TOPtoTOP as a platform for young people to express their ideas and solutions for climate protection and contributed an important message to the conference. This unique initiative is based on environmental sustainability and to prove that great things can be achieved in balance with nature. The goal of the expedition is to bring awareness of environmental issues, to promote the search for environmentally compatible solutions and to encourage the start of projects beneficial to our climate.

A major part of their mission is to inspire children to achieve a better future. They share examples of nature's beauty and innovations for a green planet in class rooms all over the world and also give presentations to universities, service clubs and other organisations throughout the world. Already, they have taught over 50,000 children across the globe! They teach students about the importance of nature and give them various fun projects to learn all about sustainability. The students are then encouraged to express their own ideas about how we can care more for our environment and climate in the TOPtoTOP International Climate Solution Contest. TOPtoTOP aims to show case these solutions from the youth also in the Hawaii Islands.

TOPtoTOP has chosen this expedition as an adventurous means to create awareness of global climate change and inspire the world to research and support lasting, environmentally friendly solutions. To expand the reach of this expedition and its aim, TOPtoTOP is working closely with the media, scientists and business worldwide.

Another aspect of the initiative is the clean ups. They have done clean ups at each of their destinations. The last TOPs they cleaned from trash were the top of EVEREST and the TOP of Africa, Kilimanjaro. On the current voyage they have cleaned many beaches

as well and are looking for volunteers to continue their clean-up events also in Hawaii.

All these achievements would never have been made possible without the generous support of their sponsors, particularly their two major sponsors **SGS** and **Victorinox**. **SGS** and **Victorinox** have both been actively involved in keeping PACHAMAMA ready for this incredible voyage. Their support as well as the patronage of the **United Nations Environmental Program** and **Presence Switzerland** is a crucial aspect of the success of the TOPTO TOP expedition. Both companies and organizations are great examples of institutions that are increasingly embracing the principles of environmental sustainability in their planning, reporting and decision-making.

For further information and live updates on the expedition's progress, please visit the TOPTO TOP website: [www.toptotop.org](http://www.toptotop.org) ...and their blog: [www.expedition.toptotop.org](http://www.expedition.toptotop.org)

- **The expedition aims** to demonstrate that great goals and progress can be achieved in balance with nature.
- **The mission** is to inspire young people for a better future. Along the expedition we show examples of nature's beauty and promote innovations for a green planet and specially to protect our climate, in class rooms all over the world.
- **The key messages** are "climate protection" and "enjoy nature through sport but also give something back to nature".
- **The vision** is that TOPTO TOP becomes a lasting platform which brings active people closer to nature and sports.
